Girls in Ocean Science Teen Conference

These exciting conferences are dedicated to inspiring young women to pursue degrees and careers in the sciences. Sixteen prominent female scientists from around the country will interact with the girls in a series of hands-on workshops aboard our research vessel, R/V Sea Explorer, and in the Ocean Institute’s teaching labs.

The conferences, split into two day-long programs, are designed for enthusiastic middle and high school girls who have an interest in science. Girls will explore careers in areas such as oceanography, marine ecology, computer science, engineering and astronomy.

Dates:  
February 24, 2018 – Middle School Conference
March 17, 2018 – High School Conference

Time:  
8:30am – 4:00pm
